The District Operations Manual is an abridged version of the Programme’s operations manual targeting district level actors and service providers. The manual contains background information on the programme including the concept, objectives and goals and most importantly the roles and responsibilities of district level actors including, the District Assembly, the District Implementation Committee and School implementation Committee. It further provides clear direction on roles and participation at the community and school levels including the conduct of caterers, issues on hygiene and safety as well as templates for reporting and gathering information on the education, health and agriculture components of the programme.
